

For Release: April 18th, 2022

Attention Biocitizen LA community,

It is with great pleasure that starting April 19th, 2022 Biocitizen LA will allow outdoor masking to be optional for our teaching staff. This decision follows the policy updates as set forth by the [LA County Department of Health](#) and adoption by [LAUSD](#), as well as the decreased case count and virality of covid in outdoor spaces with vaccinated individuals.

As a note, all staff and students will continue to mask indoors or during any programs that include vanning. Thank you for your continued support in speaking to your child about social distancing and reporting any flu-like symptoms in a timely manner.

Please refer to our current [COVID-19 protocols](#) for all the [updates](#).

This decision marks a continued cautious return to normalcy in connecting with each other, and our spaces. We would not be here without your commitment to helping us make Biocitizen LA a safe and enriching experience for our entire community.

Wishing everyone continued healthful steps into Spring!

Biocitizen LA
